McALPINE

Providing Better Solutions for the Trade

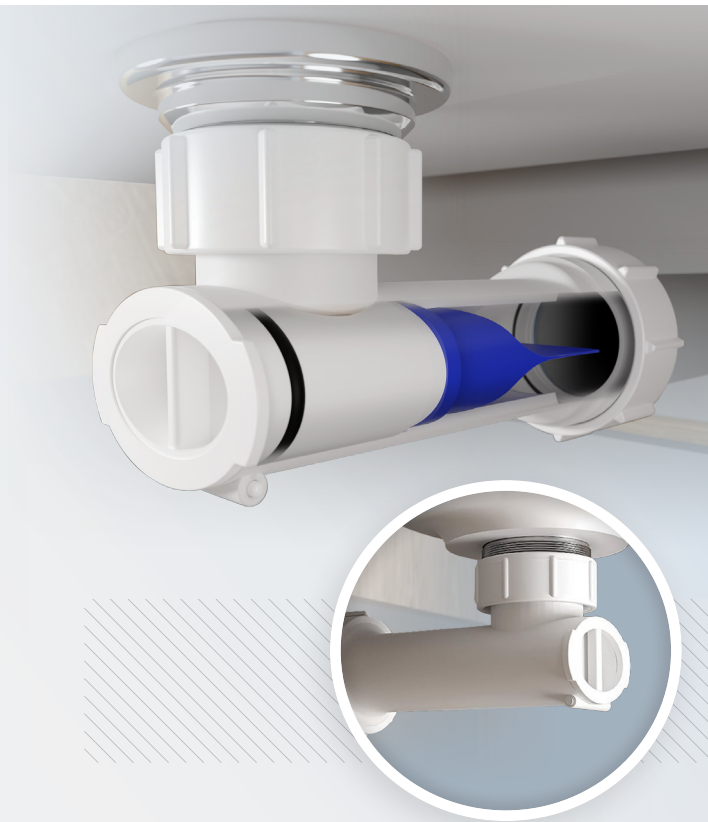

Introducing our new range of black fittings, and great problem-solving valve products

90mm Shower Trap with Non-Return Valve

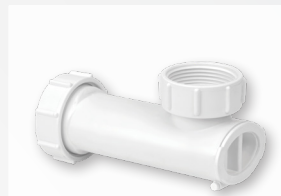

The **ST90CP10-NRV** Shower Trap acts as a non-return valve. The weight of the water discharge will open the valve and it will reseal when the discharge has ceased thus prohibiting foul air from entering the house.

- Valve can be easily removed to facilitate easy cleaning of the trap
- Overall height is only 53mm making this trap particularly suitable where floor depth is restricted
- Flow Rate of 26 litres per minute when tested under a constant 15mm head of water

1 1/4" & 1 1/2" Space Saving Waste Valves

- Space Saving Trap Solutions:
 - **WHB-1:** 1 1/4" – Overall Height 62mm
 - **WV-1:** 1 1/2" – Overall Height 75mm
- The **WHB-1** and **WV-1** self-cleaning waste valves have no water seal, so can never dry out through evaporation or lack of use.

WHB-1
1 1/4"

WV-1
1 1/2"

Macvalve

Great for fitting horizontally or vertically. Perfect to stop smells and backflow. With no water seal, it can never dry out through evaporation or lack of use, as the membrane remains sealed.

- Available in 1 1/4" and 1 1/2" sizes
- BSP female inlet nut x universal compression outlet
- Can be fitted in installation where a non-return valve can be of benefit to the plumbing installation

MACTUN-1
15mm x 22mm
Compression

MACTUN-2
15/22mm x 1 1/4"
Compression

Tundish with Self-Closing Valve

- The only combined tundish and non-return valve with a silicone membrane seal.
- The membrane seal has no spring mechanism and shall not be affected in hard water areas.
- The membrane seal creates no resistance to the discharge flow from PRV/TRV valve preventing any splashing.
